HOW TO ACCESS YOUR RATE CARD

Once you have logged into the B CONNECTED portal you will land on your Dashboard. In the top left hand side of your screen you will find the 'Rates' tab. Click this tab to view your rate card.

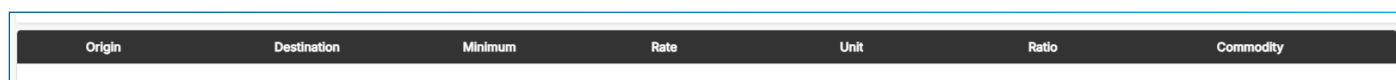

If you are looking for a specific laneway you can use the dropdown filters to find this:

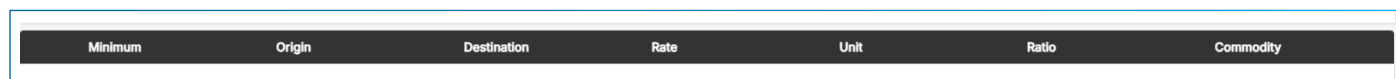

The screenshot shows a horizontal row of three dropdown menus. The first is labeled 'Origin' and has a dropdown arrow. The second is labeled 'Destination' and has a dropdown arrow. The third is labeled 'Commodity' and has a dropdown arrow.

If there is a laneway that is not available to you, please reach out to one of our Sales team to assist you with a quote.

You can also view your rate card data as a pivot table by clicking and dragging the black boxes to arrange the fields to best suit your personal viewing.

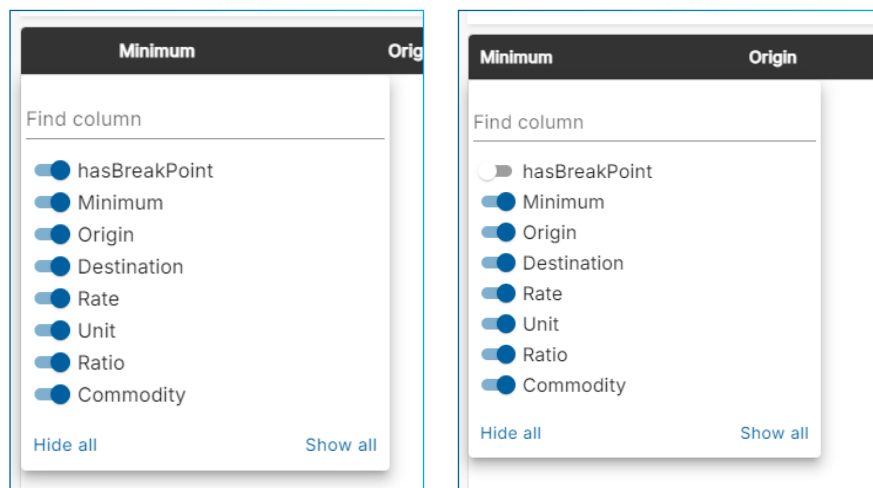

Origin	Destination	Minimum	Rate	Unit	Ratio	Commodity
--------	-------------	---------	------	------	-------	-----------

Minimum	Origin	Destination	Rate	Unit	Ratio	Commodity
---------	--------	-------------	------	------	-------	-----------

To hide any of the available columns, click the three dots that appear next to each tab, scroll to manage columns, and turn the blue slider to the left.

The left screenshot shows a modal window for the 'Minimum' tab. It has a 'Find column' search bar and a list of columns with sliders: hasBreakPoint (off), Minimum (on), Origin (on), Destination (on), Rate (on), Unit (on), Ratio (on), and Commodity (on). At the bottom are 'Hide all' and 'Show all' buttons.

The right screenshot shows a modal window for the 'Origin' tab. It has a 'Find column' search bar and a list of columns with sliders: hasBreakPoint (off), Minimum (on), Origin (on), Destination (on), Rate (on), Unit (on), Ratio (on), and Commodity (on). At the bottom are 'Hide all' and 'Show all' buttons.

To turn these back on, select the three dots again, manage the columns button and slide the slider to blue.

If the laneway you are wanting to see has multiple breakpoints in the rate you've been provided, you might not display a rate in the grid. To view these, click the plus icon on the left for an expanded view of all breakpoints.
